Phone: +201202688312

Education:

- Faculty of Computer science – Sadat Academy   *(Sep 2023)*
  - Third Year at Sadat Academy
  - Excellent in four terms and GPA 3.6
  - Relevant courses: Database, Digital circuitry, Data structure, Algorithm
  - Major: Software Engineering

Experience:

- Courses:
  - Python Programming Course   *(Oct 2025)*

    Strong understanding of Python basics, Practical experience through exercises and small applied examples.

  - Spring Boot 3 – Udemy   *(Jul 2025)*
    - Gained a solid understanding of **Spring Boot 3 fundamentals**, including dependency injection, RESTful APIs, application configuration, and component-based architecture.
    - Worked through hands-on exercises to build and test **REST APIs**, handle requests/responses, and implement controllers, services, and repositories using Spring MVC.
    - Acquired strong knowledge of **Spring Data JPA**, including entity mapping, repositories, database interaction, and CRUD operations.
    - Learned how to configure and work with **SQL databases**, environment properties, and application profiles.
    - Gained familiarity with key Spring Boot production features such as **exception handling, validation, logging, and application packaging**.

- Mastering Angular (v17–18) – Udemy *(Jul 2025)*
  - Built a complete **E-commerce web application** utilizing modern Angular architecture and modular, reusable components.
  - Acquired strong proficiency in **core Angular concepts**, including routing, services, dependency injection, API integration, and state management best practices.
  - Gained hands-on experience with **latest Angular features**, such as Signals and the new control-flow syntax, while applying clean code principles and performance optimization technique

- Front-end (HTML and CSS) *(Feb 2025)*
  Proficient in structuring and styling web pages using HTML and CSS,
  And learn some basic knowledge about (JavaScript)

- Marketing *(Sep 2024)*
  Digital Marketing, Campaign Management, Market & Audience Analysis, SEO & Content Marketing, Planned and executed a marketing campaign on social media platforms, analyzed customer data and provided insights for performance improvement

- C++ Programming Course *(April 2024)*
  Fundamentals of C++ and program structure, Object-Oriented Programming (OOP), Data structures and algorithms

- **Internships:**
  - Full Stack Java Intern – Soulco Codecraft *(Jul 2025 – Aug 2025)*
    - Worked with Angular 17 and Spring Boot 3
    - Applied Agile Scrum and testing methodologies using Jira
    - Contributed to real-world projects with guidance from senior leads
    - Strengthened skills in Java and Object-Oriented Programming
    - Gained hands-on experience with SQL databases in Spring Boot

- o SBS Protech *(Jul 2024)*

  During my time at SBS Protech, I engaged with experienced professionals to learn from their expertise and understand the company's workflow. I gained insights into how the company operates, its structure, and the services it provides.

Skills:

- Front-End: Angular, HTML, CSS
- Back-End: Java (Spring Boot)
- Databases: SQL Server
- Concepts: OOP, Data Structures, Algorithms
- Tools: Jira, Git

Projects:

- o **Online Pharmacy Website:**

(Front-end Development) Developed a responsive online pharmacy website using HTML and CSS, focusing on: Clean and structured UI design, Well-organized navigation and product display sections .

Extracurricular Activities:

- o Member of Verse Student Activities *(2025)*
- o Member of Aibe Student Activities *(2024)*
- o Member of Hult Prize Student Activities *(2023-2024)*
